

# COMPLIANCE REPORT

April 2020 - September 2020

QUARRY PROJECT

**M/s SRI LAKSHMI STONE CRUSHER**

KANNUR DISTRICT

KERALA

Dt.13-11-2020

The Member Secretary  
District Environment Impact Assessment Authority (DEIAA),  
DEIAA, Kannur

Ref :- File No. 09/KNR/2017/ DEIAA

Sub :- Environment Clearance – Quarry project at Survey No. 1561,  
Kanichar Village, Iritty Taluk, Kannur District, Kerala – Compliance  
Report –First half - Reg.

Respected Sir,

The Quarry (Building stone) project was accorded Environmental Clearance for 0.9898 Ha. by order No. 09/KNR/2017/ DEIAA dated 01-07-2017 by District Environmental Impact Assessment Authority, Kannur, Kerala. The compliance report of First half (April 2020– September 2020) to the specific and general conditions of the Environment Clearance order is enclosed.

Thanking you,

Yours respectfully,

M/s. Sri Lakshmi Stone Crusher

## INTRODUCTION

Quarry project of **M/s. Sri Lakshmi Stone Crusher** is situated at Survey No. 1561, Kanichar Village, Iritty Taluk, Kannur District, Kerala.

The quarry project was accorded with the Environmental Clearance (EC) by District Environmental Impact Assessment Authority (DEIAA), Kannur on 01-07-2017. As part of general condition No.37 of Environmental Clearance order, half yearly compliance report needs to be submitted by the project proponent. The compliance report of First half to the specific conditions and general conditions of the Environmental Clearance order for the period of **April 2020 – September 2020** is being submitted.

# **COMPLIANCE REPORT**

## **(SPECIFIC CONDITIONS)**

### **PART A**

**PART - A – SPECIFIC CONDITIONS**

<b>01</b>	<b>A mines manager shall be appointed to control ,direct, manage and supervise the quarrying operations required under the mines Act ,1952</b>	<b>complied</b>
-----------	--	-----------------

To control direct, manage and supervise the quarrying operations as per the Mines Act 1952 the project proponent has appointed Mines manager. The certificate of Mines engineer and Form D is attached as **Annexure No 9**.

<b>02</b>	<b>Health and welfare for the persons employed shall be implemented</b>	<b>complied</b>
-----------	---	-----------------

The project proponent has basic health and welfare for the persons employed in the project site. The project proponent is keeping a First aid box in the project site. Other facility of housing, food, water and sanitation has been providing by the project proponent.

<b>03</b>	<b>Controlled blasting should be practiced and blasting shall be done only during day time. The mitigate measures for control of ground vibration to arrest the fly rocks and boulder should be implemented.</b>	<b>Complied</b>
-----------	--	-----------------

The blasting is done in controlled manner by using ordinary delayed detonators to reduce ground vibration. All blasting activities are carrying out with the stipulated guidelines of explosive department and other concerned agency. No work will be there in the quarry site at Night. The mitigate measures to arrest ground vibration and fly rock is detailed in General condition No 11. The blasting time in the quarry is in day time at 9.00-10.30 am, 2-3 pm and 4.00 - 5.30pm.

<b>04</b>	<b>Plantation shall be done which includes a green belt of adequate width around the mining lease area excluding the rocky area, along roads, overburden dumps and non-</b>	<b>Being Complied</b>
-----------	---	-----------------------

	<b>mineralized area by planting suitable native species in consultation with the local DFO/Agriculture department.</b>	
--	--	--

The project proponent has taken the suggestion of agricultural department to plant the native species in order to provide green belt in the project site. The project proponent has started to plant various saplings in the project site to develop a green belt around the project area. Avenue trees also planted along the road side to minimise the dust emission. More than 120 saplings were planted in the project site. Photograph of plantation is attached as **Plate No.2**

<b>05</b>	<b>The drains should be regularly de silted and maintained properly check dam and gully checks shall be constructed wherever to required to arrest siltation.de siltation shall be done every year before the onset of monsoon</b>	<b>Being Complied</b>
-----------	--	-----------------------

To arrest the quarry waste entering in to the public drain and stream, the project has constructed De siltation chambers. These chambers will be de silted during summer season.

<b>06</b>	<b>Fencing shall be maintained properly all around the lease area.</b>	<b>Complied</b>
-----------	--	-----------------

To demarcate the lease area, the project proponent has installed fencing around the lease area. This will help to prevent falling of animals/human being/dumping of garbage etc.

<b>07</b>	<b>The CSR need redrafting with inclusion of felt needs of the locality with special emphasize for implementing ground water recharging water recharging techniques in and at the vicinity of the proposed site.</b>	<b>Complied</b>
-----------	--	-----------------

The CSR has redrafted and submitted with the felt needs of the locality with special emphasize on ground water recharging techniques. It was submitted at DEIAA

<b>08</b>	<b>Appropriate sign boards should be displayed.</b>	<b>Complied</b>
-----------	---	-----------------

To give warning to the labours and community people prior to the blasting in quarry, the project proponent installed warning alarms as per the stipulation of Explosive department in the quarry site. To aware the labours and general public about the blasting a board containing blasting time has displayed in the project site.

<b>09</b>	<b>The blasting time must be displayed and strictly adhered to.</b>	<b>Complied</b>
-----------	---	-----------------

To give notice to the labours and community people prior to the blasting in quarry, the project proponent installed a board showing the blasting time in the quarry site. The blasting time is 9.00-10.30 am, 2-3 pm and 4.00 - 5.30pm. The photograph of the board showing blasting time is attached as **Plate No.4**

<b>10</b>	<b>Dust suppression mechanism must be in place.</b>	<b>Complied</b>
-----------	---	-----------------

The project proponent splashes the haulage road and critical areas with the help of vehicles in regular intervals to arrest dust emissions from the road while transportation of materials.

<b>13</b>	<b>A separate small plot to be maintained in the premise to preserve rare and endemic species. If any, listed in the biodiversity assessment etc.</b>	<b>Being Complied</b>
-----------	---	-----------------------

The project proponent has demarcated a separate small plot to preserve the endemic species in the project site. The project proponent has started to plant saplings in the project site.

<b>14</b>	<b>The PPV values must be less than 10 mm/sec.</b>	<b>Noted</b>
-----------	--	--------------

The project proponent is using ordinary delayed detonator for blasting therefore there is no incident of fly rock is happened in the community. The project proponent is also assuring the maximum PPV is under 10 during the time of blasting.

<b>15</b>	<b>The green belt shall be provided around the periphery.</b>	<b>Complied</b>
-----------	---	-----------------

The project proponent has provided Green belt around the project area. This will reduce air and noise pollution.

<b>16</b>	<b>Where the height of the bench formed during earlier workings exceeds the maximum each of the excavator engaged for work, such bench height shall be reduced from top to bottom.</b>	<b>Noted</b>
-----------	--	--------------

The quarrying activity in the project site is progressing by creating benches of 5m width and 5m height. The extraction of minerals is from top to bottom. The exploration done as per the plan submitted before District Environment Impact Assessment Authority (DEIAA), Kannur.

<b>17</b>	<b>Loose or hanging rock or mineral boulder on the side wall shall be dressed down before engaging persons for work at the bottom of the bench.</b>	<b>Being Complied</b>
-----------	---	-----------------------

The labours work on the bottom bench only after clearing loose minerals from the side wall. The vehicles like JCB, breakers are used to remove the loose or hanging mineral boulders in the project site.

<b>18</b>	<b>Permanent boundary pillars should be fixed by the proponent before commencing quarrying</b>	<b>complied</b>
-----------	--	-----------------

Boundary pillars are fixed permanent in the project site before commencing quarrying to demarcate the project site.

<b>19</b>	<b>No quarry blasting to be undertaken and sustained till warning time limit expires and /or when continues 48 hours cumulative rainfall exceeds 8 cm and blasting shall be resumed until 24hrs. of rain free situation arises in the quarry locality based on the evaluation by the revenue officials.</b>	<b>Noted</b>
-----------	---	--------------

No quarry blasting to be undertaken and sustained till warning time limit expires and /or when continues 48 hours cumulative rainfall exceeds 8 cm and blasting shall be resumed until 24hrs. The condition will be complied by the project proponent when such situation arises

20	<b>All waste dumps and topsoil dumps shall be properly stabilized by using coir mats or bio regeneration .proper drainage system shall be provides so the water is properly diverted away from the dump slopes with no disturbance to the stability of the slopes.</b>	<b>Being Complied</b>
----	--	-----------------------

The waste dumps and topsoil dumps are being stabilised by bio regeneration. Proper drainages are constructed by the project proponent, which will help to manage the storm water to prevent soil erosion from the dump during monsoon season.

21	<b>All dumps slopes shall be sufficiently stabilized by using appropriate species mix of grass .creepers, shrubs &amp; trees. This shall be done in consultation with the forest department and local research institution and experts in stabilization of mine dumps.</b>	<b>Noted</b>
----	--	--------------

Overburden is an inevitable by-product of building stone quarry. The overburden materials are stored within the site at designated place. The project proponent has planted appropriate grass on the dump to prevent sliding and soil erosion.

22	<b>Garland drains of at least 2m width shall be provided all along 7.5 m buffer zone to divert the water from entering the quarrying slopes. These drains shall be cleaned every year before the monsoon season.</b>	<b>Noted</b>
----	--	--------------

The project proponent has initiated steps to construct storm water drains in the lower slopes of the project area for effective management of storm water. This helps to

channelize the storm water to the rain water collection pond and the most of the debris will be settled down in the bottom of the pond.

23	<b>The water from the garlands drainage shall directed to the silt settling ponds. The clarified overflow from silt settling ponds shall be directed to a Rain Water Harvesting (RWH) pond before releasing the clarified water to the natural watercourse.</b>	<b>Complied</b>
----	---	-----------------

The water from the garlands drainage is directing to the silt settling ponds. The construction of RWH pond is almost constructed. The clarified overflow from silt settling ponds will be directed to a Rain Water Harvesting (RWH) pond before releasing the clarified water to the natural watercourse.

24	<b>A retaining wall of stone rubbles with wire mesh, of sufficient width and strength (not less than 2m) shall be constructed at the bottom of the slope of the quarry lease area to arrest any likely roll of boulders during heavy rainfall.</b>	<b>Being complied</b>
----	--	-----------------------

A retaining wall of laterite stone, of sufficient width and strength (not less than 2m) is being constructed at the bottom of the slope of the quarry lease area to arrest any likely roll of boulders during heavy rainfall.

# **COMPLIANCE REPORT**

## **(GENERAL CONDITIONS)**

### **HEALTH**

<b>01</b>	<b>First Aid kit provide in the work site. It shall be periodically maintained properly .some labourers shall be trained on First Aid.</b>	<b>Complied</b>
-----------	--	-----------------

Project has kept first aid box in the project site in order to provide first aid during injuries happen to the labours in the project. The project has given training for the selected labours in the project site to use first aid box. The first aid kit is periodically maintained. Photograph showing First Aid Box is attached as **Plate no.11**

<b>02</b>	<b>Whole some drinking water should be provided.</b>	<b>Complied</b>
-----------	--	-----------------

Pure drinking water is available at all time for everyone in the project site.

<b>03</b>	<b>Premises should be maintained as wet to suppress the dust.</b>	<b>complied</b>
-----------	---	-----------------

The project proponent splashing water on haulage roads and loading and unloading point to reduce the emission of dust

<b>04</b>	<b>Sanitary type of latrines and urinals should be provided.</b>	<b>Complied</b>
-----------	--	-----------------

The project proponent gives importance to the sanitary needs of workers in the project site. So the project proponent has given sanitary type of latrine and urinals to every labour in the project site.

<b>05</b>	<b>Resting place should be provided for workers.</b>	<b>Complied</b>
-----------	--	-----------------

The project proponent has provided adequate rest rooms in the project area to get proper rest to the labours. **Plate No. 6** shows the photograph of resting room.

<b>06</b>	<b>'No Smoking' board should be exhibited according to COTPA Act.</b>	<b>Complied</b>
-----------	---	-----------------

The project proponent has displayed No smoking area in the project site. Photograph of the no smoking board is provided at **Plate No. 7**

<b>07</b>	<b>Work should not be done in night.</b>	<b>Complied</b>
-----------	--	-----------------

The quarrying activities are limited to day time only as per KSPCB guidelines in order to reduce the inconvenience of community. The working time of quarry is from 7 am to 6 pm.

<b>08</b>	<b>Details of nearest hospitals, shortest route to hospitals and contact no etc. Should be available.</b>	<b>Complied</b>
-----------	---	-----------------

In the project site Details of nearest hospital, Fire station, Police station, etc are available. **Plate No. 8** shows the photograph of details of emergency contact numbers.

<b>09</b>	<b>Approach roads should be maintained properly.</b>	<b>Being complied</b>
-----------	--	-----------------------

To arrest the dust emission and easy transportation the approach road has been properly maintaining by the project proponent in the project site.

# **COMPLIANCE REPORT**

## **(GENERAL CONDITIONS)**

### **PART B**

**PART – B – GENERAL CONDITION**

<b>01</b>	Rain Water Harvesting capacity should be installed as per the prevailing provisions of KMBR / KPBR, unless otherwise specified.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

The project proponent has developed two rain water harvesting pond in the quarry site as Rain Water Harvesting structure. The pond situated at the lowest level of project site. The surface runoff is channelized to the pond through garland drains. The rain water is used for irrigation purposes, watering of plants, wetting of roads and for dust suppression system (mainly sprinklers system). The photograph showing the rain water collection pond in the project area is attached in **Plate No 12**.

<b>02</b>	Environment Monitoring Cell (EMC) as agreed under the affidavit filed by the proponent should be formed and made functional.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

The Environmental Monitoring Cell (EMC) was formed with Mr. C G George as head of the monitoring cell. The EMC meetings of the cell convene periodically and evaluate the activities towards the stipulations of Environmental Clearance order. The details of the monitoring cell are given in the **Table No.1**. The NABET accredited consultant helps the company to upkeep the environment friendly mining

**Table 1 - Environmental Monitoring Cell (EMC)**

Sl. No.	Post	Name
1	Head of monitoring cell	C G George
2	Member	Nigil
3	Member	Chandrasekhar G P

<b>03</b>	Suitable avenue trees should be planted along either side of the tarred road and open parking areas, if any, inclusive of approach road and internal roads.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

The project proponent has been planting various tree saplings and native species in the project site to enhance the eco – diversity in the industry. Green belt is an important component in the mining sector. To reduce air and noise pollution, the project proponent has planted various avenue trees along either side of the road. There is also natural vegetation including trees, shrubs and climbers are presents in the sides of road and parking area. This will help to reduce air and sound pollution. Photograph of plants along either side of the road is shown in **Plate No. 1**.

<b>04</b>	Maximum possible solar energy generation and utilization shall be ensured as an essential part of the project.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

The installation of solar can reduce the consumption from conventional sources therefore the project proponent has installed solar street lights in the project site to use maximum renewable energy to reduce electrical consumption from KSEB. The lights are maintained by the project proponent effectively.

<b>05</b>	Sprinklers shall be installed and used in the project site to contain dust emissions.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

The project splashes the haulage road and critical areas with the help of vehicles in regular intervals to arrest dust emissions from the road while transportation of materials. The sprinklers are also installed in the critical area to reduce the dust emission. The photograph of the sprinklers is attached as **Plate No.2**.

<b>06</b>	Eco-restoration including the mine closure plan shall be done at the own cost of the project proponent.	<b>Noted</b>
-----------	---	--------------

**Compliance:**

Eco restoration is in an integral part of mining activity. The eco restoration and the mine closure plan will be done at the own cost of the project proponent as per the approved mining plan.

<b>07</b>	At least 10 percent out of the total excavated pit area should be retained as water storage areas and the remaining area should be reclaimed with stacked dumping and overburden and planted with indigenous plant species that are eco-friendly, if no other specific condition on reclamation of pit is stipulated in the EC.	<b>Noted</b>
-----------	---	--------------

**Compliance:**

After closure of the mine, the project proponent is intending to retain 10 percent of total excavated pit as rain water storage area. The remaining area will be reclaimed with stacked dumping of overburden and top soil. As part of its eco – restoration plan, the project will plant indigenous plant species that are eco – friendly on the reclaimed area.

<b>08</b>	Corporate Social Responsibility (CSR) agreed upon by the proponent should be implemented.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

The project proponent has carrying out many activities for social integration and community development. The activities under Corporate Social Responsibility (CSR)/ Corporate Environmental Responsibility (CER) activities are executed in the sector of Health, Housing. The project proponent is intending to carry out more activities under CSR for inclusive growth in the community. The details are given below in the table.

**Table No.2 – CSR/CER Details**

<b>Sectors</b>	<b>Activities</b>	<b>Beneficiaries</b>	<b>Amount spent in Rs.</b>
<b>Infrastructure Development</b>	Donation	P. Chandran, Palmi House, 27TH Mile, Poolakutty	75000
	Donation	Chandran Theyyadi Narikode thhovakunnu	25000
	Donation	Sumathi 27 th mile poolakutty	50000
	Donation	gopi seminarivilla	3250
	Donation	basheer poolakutty	7799

<b>Social</b>	Donation	nirmmal charitable society	1000
<b>Total</b>			<b>162049</b>

<b>09</b>	The lease area shall be fenced off with barbed wires to a maximum height of 4ft around, before starting of mining. All the boundary indicators (boards, stores, markings etc) shall be protected at all times and shall be conspicuous.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

To demarcate the lease area, the project proponent has installed fencing around the area where lease obtained. The complete installation of barbed metal wire fencing around the mining area is with height of 4 ft. All the boundary indicators (boards, stores, markings etc) will be protected at all times and shall be conspicuous. The photograph of barbed metal wire fencing is provided in **Plate No.15**.

<b>10</b>	Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged as per stipulations of Explosive Department.	<b>complied</b>
-----------	---	-----------------

**Compliance:**

The alarm can intimate the general public and labours that the blasting is going to happen. As per the stipulation of Explosive department and State Environment Impact Assessment Authority the project proponent has installed warning alarms in the quarry site.

<b>11</b>	Control measures on noise and vibration prescribed by KSPCB should be implemented.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

The noise and vibration are an adverse impact in a mining industry. To reduce noise level in the project site, the project proponent has implemented mitigate measures. The major noise generating sources from the mining activity is working

machineries, drilling, blasting and plying of vehicles. The following control measures are undertaken to bring down the noise levels:-

- Proper maintenance of machinery and equipments
- The machineries like breaker and excavator has well sound proof cabin so that the machine operators can work without stress due to the sound.
- Personal protective devices i.e., ear plugs are provided to workers working in high noise areas.
- The mining activity held in day time only.
- Noise level at quarry site checked periodically.
- 

### ***Blast vibrations and control measures***

- ❖ Controlled blasting technique is adopted in this project in order to reduce blast vibrations.
- ❖ Ordinary detonators are using for the blasting
- ❖ The maximum charge per delay is not more than 10kg to limit the PPV values to 10mm/sec.
- ❖ Optimum delay sequence and stem to column ratio is maintaining to minimize the ground vibration intensity.

<b>12</b>	Quarrying activities should be limited to day time as per KSPCB guidelines/specific conditions.	<b>Complied</b>
-----------	---	-----------------

### ***Compliance:***

Quarrying activities are limited to day time only as per KSPCB guidelines. This will help to limit the sound pollution. The quarry working time is 7.00am to 6.00 pm. This will help to limit the sound pollution.

<b>13</b>	Blasting should be done in a controlled manner as specified by the regulations of explosives department or any other concerned agency.	<b>Complied</b>
-----------	--	-----------------

### ***Compliance:***

The project proponent has appointed a license person to supervise and monitor all the activities carrying out in the project site. The blasting is done in controlled manner by using ordinary/electrical delayed detonators. All blasting activities are

carrying out with the specified regulations of explosive department. The blasting time is displayed in the sign board and all blasting happens in the specified timings. The blasting time in the quarry is in day time at 9.00-10.30 am, 2-3 pm and 4.00 - 5.30pm. The photograph of the board showing blasting time is attached as **Plate No.4**

<b>14</b>	A licensed person should supervise/control the blasting operations.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

The project proponent has appointed a mines manager to supervise/control the blasting operations for the exploitation of minor minerals from the project site. The certificate of Mines engineer and Form D is attached as **Annexure No 8**.

<b>15</b>	Access roads to the quarry shall be tarred to contain dust emissions that may arise during transportation of materials.	<b>Being Complied</b>
-----------	---	-----------------------

**Compliance:**

To contain dust emissions and for the trouble free transportation of materials, the project proponent has tarred the access road of 1 km to the quarry site. The project proponent splashes water on the road to arrest the dust production during summer season. The project proponent is regularly maintaining the access road in a good manner. The photograph of road is attached as **Plate No.13**.

<b>16</b>	Overburden materials should be managed within the site and used for reclamation of mine pits as per mine closure plan/ specific conditions.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

In a building stone quarry project, the overburden and topsoil need to extract during the time of mining, these natural resources is being staked in the project site. This will be used for plantation, haulage roads and land filling in the mining area. No overburden will let out from the project site. Photograph showing Over Burden is attached as **Plate no.14**

<b>17</b>	Height of the benches should not exceed 5m, and width should not be less than 5m, if there is no mention in the mining plan/specific conditions.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

The quarrying has been carrying out as per mining plan. To enhance safety and conserve environment, the project proponent is extracting the minerals by creating benches. The benches will not exceed 5 meters of height. The project maintains the width of benches minimum of 5 meters. **Plate No.8** showing the work progressing in the quarry area. The photograph of the benches is attached as **Plate No. 3**

<b>18</b>	Mats to reduce fly rock blast to a maximum of 10 PPV should be provided.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

The project proponent is yet to use blasting mat to reduce fly rocks during blasting. The project proponent is using ordinary delayed detonator for blasting therefore there is no issue with fly rock in the community and the project proponent also assure the maximum PPV is under 10.

<b>19</b>	Maximum depth of mining from general ground level at site shall not exceed 10m.	<b>Noted</b>
-----------	---	--------------

**Compliance:**

Mining depth will not exceed beyond 10 meter or not below the level of the nearest stream bed, whichever is less. The instruction regarding to this has given to the mines manager.

<b>20</b>	No mining operations should be carried out at places having a slope greater than 45°.	<b>Noted</b>
-----------	---	--------------

**Compliance:**

There is no area seen with slope greater than 45° high in the E C obtained area. The project proponent is extracting building stone in the area where Environment Clearance and Lease is obtained.

21	Acoustic enclosures should be provided to reduce sound amplifications in addition to the provisions of green belt and hollow brick envelop for crushers so that the noise level is kept within prescribed standards given by CPCB/KSPCB.	<b>Being Complied</b>
----	--	-----------------------

**Compliance:**

To reduce the impact of sound to the labours in the mine, the project proponent has provided ear plugs. All machines are new. Vegetation around the mining area will help to reduce noise and air pollution. This helps the noise level kept within prescribed standards. There is no crusher unit in the project site.

22	The workers on the site should be provided with the required protective equipments such as ear muffs, helmet, etc.	<b>Complied</b>
----	--	-----------------

**Compliance:**

The project proponent has provided adequate Personnel Protective Equipments (PPE) such as helmets, ear muffs, safety belts, gloves, etc. to labours in the quarry site in order to ensure the safety of workers in working site.

23	Garland drains with clarifiers to be provided in the lower slopes around the core area to channelize storm water.	<b>Complied</b>
----	---	-----------------

**Compliance:**

The project proponent ensured that all storm water from the mining area is flowing in to the pond created at mining area. The project proponent has created garland drains in the lower slopes. The project proponent has created garland drains where it is necessary in the project area for the effective storm water management.

24	The transportation of minerals should be done in covered trucks to contain dust emissions.	<b>complied</b>
----	--	-----------------

**Compliance:**

To avoid dust emission while transportation of materials, the project proponent assured the trucks were covered before it leaving the project site.

<b>25</b>	The proponent should plant trees at least 5 times of the loss that has occurred while clearing the land for the project.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

As part of concurrent eco restoration, the project proponent has planted various saplings in the project area as a compensation of loss of trees while clearing the land for mining.

<b>26</b>	Disposal of spent oil from diesel engines should be as specified under relevant Rules/Regulations.	<b>Being complied</b>
-----------	--	-----------------------

**Compliance:**

The volume of used oil is low in the industry, a major portion of used oil is using as lubricant in the project site. The execs have been giving to agencies approved by Pollution Control board.

<b>27</b>	Explosives should be stored in magazines in isolated place specified and approved by the explosives department.	<b>complied</b>
-----------	---	-----------------

**Compliance:**

Explosives are stored in magazine. The magazine situated in an isolated place specified and approved by the explosives department. The area surrounded to the magazine was fenced with barbed metal wire. The photograph of the magazine is attached as **Plate No. 9**

<b>28</b>	A minimum buffer distance of 100m meter from the boundary of the quarry to the nearest dwelling unit or other structures, not being any facility for mining shall be provided.	<b>complied</b>
-----------	--	-----------------

**Compliance:**

The project proponent strictly adhered all guidelines issued by Kerala State Pollution Control Board. Adequate distance from the houses and other buildings are kept. The norms of Kerala State Pollution Control Board regarding the distance criteria of residences, roads, rivers and worship places is adhered by the project.

<b>29</b>	100 m buffer distance should be maintained from forest boundaries.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

The project proponent has left more than 100 meters as buffer distance from the project site.

<b>30</b>	Consent from Kerala Pollution Control Board under Water and Air Act(s) should have been obtained before initiating activity.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

The project proponent has obtained consent from KSPCB under Water and Air Act(s). The copy of certificate of “*Consent to Operate*” (Renewal) from Kerala State Pollution Control Board is provided. The consent is attached as **Annexure No. 1**.

<b>31</b>	All other statutory clearances should have been obtained, as applicable, by project proponents from the respective competent authorities including that for blasting and storage of explosives.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

The certificates obtained from concerned statutory authorities are enclosed in **Annexure No.1, 2, 3, 4 & 5**. The details are given in **Table No 3**

**TABLE 3 – APPROVALS FROM COMPETENT AUTHORITIES**

<b>Name of the Statutory approval</b>	<b>Name of the Statutory authority</b>
“ <i>Consent to Operate</i> ”	Kerala State Pollution Control Board
Environmental Clearance order	State Environmental Impact Assessment Authority, Kerala
License for quarry operations	Gram Panchayath
Explosive License	Ministry of Commerce & Industry – Petroleum & Explosives Safety Organization (PESO)
Permit order	Directorate of Mining and Geology

<b>32</b>	In the case of any change(s) in the scope of the project, extent quantity, process of mining technology involved or in any way	<b>Noted</b>
-----------	--	--------------

	affecting the environmental parameters/impacts as assessed, based on which only the EC is issued, the project would require a fresh appraisal by this Authority, for which the proponent shall apply and get the approval of this Authority.	
--	--	--

**Compliance:**

The project is running as per plan submitted in Environmental Impact Assessment Authority, Kerala. At present there is no change in the scope of the project. The project proponent will seek for a new Environmental clearance in the case of any change(s) in the scope of the project.

<b>33</b>	The Authority reserves the right to add additional safe guard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the Environmental (Protection) Act 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

If the Authority insists to add additional safeguards and measures in the mining industry for safety and environmental sustainability, the project proponent will be complied with.

<b>34</b>	The stipulations by Statutory Authorities under different Acts and Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act 1981, The Environment (Protection) Act, 1986 the public liability (Insurance) Act, 1991 and EIA notification, 2006.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

The stipulated orders and directions under different act and notification including EIA notification will be scrupulously followed. A brief list of various Acts and notifications which are followed by the proponent is given below

- Kerala Minor Mineral Concession Rules, 2015.

- Mines Act, 1952
- Explosive Rules, 2008
- Kerala Panchayat Raj Act, 1994
- Water Pollution (Prevention & Control) Act, 1974
- Air Pollution (Prevention & Control) Act, 1981
- Environment Protection Act, 1986
- EIA Notification, 2006 / 2009
- The Kerala Promotion of Tree Growth in Non-Forest Areas (Amendment) Act, 2007.

<b>35</b>	<p><b>The project proponent should advertise in at least two local news papers widely circulated in the region, one which (both advertisement and the newspaper) shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the Department of Environment and Climate Change, Govt. of Kerala and may also be seen on the website of the Authority at <a href="http://www.seiaakerala.org">www.seiaakerala.org</a>. <u>The advertisement should be made within 10 days from the date of receipt of the Clearance letter and the copy of the same signed in all pages should be forwarded to the office of this authority as confirmation.</u></b></p>	<b>Complied</b>
-----------	--	-----------------

### ***Compliance:***

An advertisement in two local newspapers regarding Environmental Clearance accorded to the quarry project was given within the stipulated period and the copy of the same was submitted at SEIAA Kerala. The copy of the advertisement given in two local newspapers is provided at **Annexure No.6**. The details of the news papers are given in the **Table No.4**.

**Table No.4- Details of advertisement in news papers**

<b>Sl. No.</b>	<b>News paper</b>	<b>Language</b>	<b>Date of edition</b>
<b>1</b>	Mangalam	Malayalam	21-10-2017
<b>2</b>	The Hindu	English	21-10-2017

36	A copy of the clearance letter shall be sent by the proponent to concerned Grama/District Panchayath / Municipality / Corporation / Urban Local Body and also to the Local NGO, if any from whom suggestions / representations, if any were received while processing the proposal. The Environmental Clearance shall also be put on the website of the company by the proponent.	<b>Complied</b>
----	---	-----------------

**Compliance:**

A copy of the Environment Clearance letter was submitted to the Panchayat Office. The project proponent did not receive any suggestions/ representation from anywhere while the processing the proposal therefore did not give the copy of clearance letter to anyone. The project proponent does not have a website this will be created soon. The copy of the acknowledgement is attached as **Annexure No.7**

37	The proponent shall submit six monthly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the respective Regional Office of MoEF, Govt. of India and also to the State Environment Impact Assessment Authority (SEIAA) office.	<b>Complied</b>
----	--	-----------------

**Compliance:**

The compliance report is being submitted along with the results of monitored data to the District Environmental Impact assessment Authority, Kannur, State Environmental Impact assessment Authority, Kerala and the Regional Office of MoEF&CC, Bangalore as mail. The Monitoring result of ambient air. Sound and water is attached as **Annexure Nos. 10, 11 & 12.**

38	The details of Environmental Clearance should be prominently displayed in a metallic board of 3 ft x 3ft with green background and yellow letters of Times New Roman font of size of not less than 40.	<b>complied</b>
----	--	-----------------

	Sign board with extent of lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public.	
--	---	--

**Compliance:**

The detail of the Environmental Clearance has display on metallic board in the project site. The metallic board installed as specified in the conditions of Environmental Clearance order. The photograph of the metallic board is provided at **Plate No.10.**

<b>39</b>	The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

An assurance in the form of affidavit was already submitted to DEIAA.

<b>40</b>	No change in mining technology and scope of working should be made without prior approval of the SEIAA, No further expansion or modification in the mine shall be carried out without prior approval of the SEIAA, as applicable.	<b>Noted</b>
-----------	---	--------------

**Compliance:**

The project proponent is not intending to expand the area of mine, technology and scope of working. The project proponent will appear SEIAA for Environment Clearance if the project wants to expand its scope.

<b>41</b>	The project proponent shall ensure that no natural water course and/or water resources shall be obstructed due to any mining operations. Necessary safeguard measures to protect the first order streams, if any originating from the mine lease shall be taken.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

The Rain water harvesting pond in the site is working as clarifiers to prevent the quarry waste within the site. The project proponent will install additional clarifiers in the

project site to prevent sediments and wastes from quarry site to enter in to the main stream. The project proponent will constitute a Cell to monitor such commitments to the community.

<b>42</b>	Monitoring of Ambient air Quality to be carried out based on the notification 2009, as amended from time to time by the Central Pollution Control Board. Water sprinkling should be increased at places loading and unloading points & transfer point to reduce fugitive emissions.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

The project proponent has monitored the ambient air quality as per National Ambient Air Quality Standard (NAAQS), during the time of appraisal of the project. The project proponent is intending to increase splashing of water and installation of sprinklers at loading, unloading and transfer points.

<b>43</b>	The top soil, if any, shall be temporarily stored at earmarked site(s) only for the topsoil shall be used for land reclamation and plantation. The Over Burden (OB) generated during the mining operations shall be stacked at earmarked dump site(s) only. The maximum height of the dumps shall not exceed 8m and width 20m and overall slope of the dumps shall be maintained to 45°. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for stabilization of the dump. The entire excavated area shall be backfilled. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining.	<b>Being complied</b>
-----------	---	-----------------------

**Compliance:**

To prevent the soil erosion, the top soil and overburden are stacked in designated place within the project site. Only topsoil will be used for plantation. Overburden will be used for landfill and to construct haulage roads in the mining area. The excess will be stored in a designated place as per the direction of District

Environment Impact Assessment Authority (DEIAA). The Environment Monitoring Cell will monitor the execution of eco restoration.

44	Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps to prevent run off of water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc., The drains shall be regularly de silted particularly after monsoon and maintained properly.	<b>complied</b>
----	---	-----------------

**Compliance:**

The project proponent has constructed effective garland drains to catch all the storm water during the time of monsoon season. These channels directed the water to the rain water collection pond. All sediments and silts are settling at the bottom of the pond and only cleared water is letting out. The water from the pond can be used for splashing of water on roads to arrest the dust. The project proponent intending to create de siltation chambers along with catch drains.

45	Effective safeguard measures such as regular water sprinkling shall be carried out in critical areas prone to air pollution and having high levels of PM <sub>10</sub> and PM <sub>2.5</sub> , such as haul road, loading and unloading points and transfer points – it shall be ensured that the Ambient Air Quality Parameters conform to the norm prescribed by the Central Pollution Control Board in this regard.	<b>Noted</b>
----	--	--------------

**Compliance:**

The project proponent splashes water in critical areas prone to air pollution with the help of vehicle and sprinklers regularly. The project proponent initiated steps to increase the number of sprinklers in critical area to reduce the dust emission such as loading and unloading points, haul roads and transfer points.

46	Fugitive dust emission from all the sources should be controlled	<b>complied</b>
----	--	-----------------

	regularly. Water spraying arrangements on haul roads, loading and unloading and at transfer point should be provided and properly maintained.	
--	---	--

**Compliance:**

The sprinklers and vehicle for water spraying are properly maintained by the project proponent. The project proponent splashes water in critical area to reduce the dust emission such as loading and unloading points, haul roads and transfer points.

<b>47</b>	Measures should be taken for control of noise levels below 85 dBA in the work environment.	<b>Complied</b>
-----------	--	-----------------

**Compliance:**

The main sound generating activities in the mining industries are the playing of jack hammer, breaker, vehicles and blasting operations. The level noise from all these activities will not go beyond 85dBA. The project proponent will take appropriate action to reduce the sound by employing possible measures.

<b>48</b>	A separate Environmental Management Cell with suitable qualified personal should be set up under the control of a senior executive, who will report directly to the Head of the Organization.	<b>Complied</b>
-----------	---	-----------------

**Compliance:**

To monitor all conditions stipulated in the Environment Clearance and environment Management Plan, the project proponent constitutes an Environment Monitoring Cell with Mr. C.G George as the head of the Cell.

<b>49</b>	The funds earmarked for environmental protection and CSR activities should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the State Environment Impact assessment authority (SEIAA) office.	<b>Being complied</b>
-----------	--	-----------------------

**Compliance:**

The project proponent executes many activities under Corporate Social Responsibility (CSR) for community development. To implement these activities in a good manner, the project proponent will open an account for keeping the funds earmarked for environmental protection and CSR.

<b>50</b>	The Regional Office of MoEF &CC located at Bangalore shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer(s) of the regional Office by furnishing the requisite data/information/monitoring reports.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

The project proponent scrupulously follows the condition stipulated in the EC order and keeping all records with a good documentation system. The project proponent will extend all possible cooperation to the officers from regional office of MoEF &CC and can produce all data/information/reports when they are asking for the same.

<b>51</b>	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred within a period of 30 days as prescribed under section 16 of the National Green tribunal Act, 2010.	<b>Noted</b>
-----------	--	--------------

<b>52</b>	Concealing the factual data or submission of false/ fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.	<b>Noted</b>
-----------	--	--------------

<b>53</b>	The SEIAA may revoke or suspend the order, for non implementation of any of the specific or this implementation of any of any of the above conditions is not satisfactory. The SEIAA reserves the right to alter/modify the above conditions or stipulate any further condition in the interest of environment protection.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

The project proponent has been implementing conditions stipulated in this Environment Clearance order. The project can execute all possible measures in the project site for the conservation of environment.

<b>54</b>	The above conditions shall prevail notwithstanding anything to the contrary, in consistent, or simplified, contained in any other permit, license on consent given by any other authority for the same project.	<b>Noted</b>
-----------	---	--------------

**Compliance:**

The project proponent will give priority to the conditions stipulated in the Environment clearance Order.

<b>55</b>	This order is valid for a period of 5 years or the expiry date of mine lease period issued by the Govt. of Kerala, whichever is earlier.	<b>Noted</b>
-----------	--	--------------

<b>56</b>	The environmental clearance will be subject to the final order of the courts in any pending litigation related to the land or project, in any court of law.	<b>Noted</b>
-----------	---	--------------

<b>57</b>	The mining operation shall be restricted to above ground water table and is should not intersect ground water table.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

The project proponent is following approved mining plan for the extraction of building stones. The project proponent will restrict its mining operations above the ground water table.

<b>58</b>	All vehicle used for transportation and within the mine shall have "PUC" certificate from authorized pollution taking centre. Washing of all vehicles shall be inside the lease area.	<b>complied</b>
-----------	---	-----------------

**Compliance:**

As part of reduce air pollution, the project proponent is monitoring the pollution level of all vehicles playing in the project site. This monitoring is conducting in authorized pollution checking centre.

<b>59</b>	Project proponent should obtain necessary prior permission of the competent authorities for drawl of requisite quantity of surface water and ground water for the project.	<b>Noted</b>
-----------	--	--------------

**Compliance:**

At present, the need of prior approval is not necessary to draw ground water and surface water for the project.

<b>60</b>	Regular monitoring of flow rates and water quality upstream and down streams of the springs and perennial nallahs flowing in and around the mine lease area shall be carried out and reported in the six monthly report to SEIAA.	<b>Noted</b>
-----------	---	--------------

**Compliance:**

There is no stream or springs flowing in and around to the mine lease area. The project proponent will install de siltation trap and other mechanism to prevent sediments and wastes from the mining area entering in to the public drainage system.

<b>61</b>	Occupational health surveillance programme of the workers should be under taken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.	<b>complied</b>
-----------	---	-----------------

**Compliance:**

The project proponent has started occupational health surveillance programme in association with Primary Health Centre (PHC) of Kerala government for the labours working in mining area and crusher.

**ENVIRONMENTAL CLEARANCE NO. 14/2017**

Sri.C.G.George,Managing Partner, M/s Sri Lakshmi Stone Crusher, 27 Mile, Poolakutty P.O., Nedumpoyil, Kannur, Kerala-670650,,vide his application received on 28/04/2017 , has sought Environmental Clearance under EIA Notification, 2006 for the quarry project for an area of 0.9898Hectares in Survey No. 1561 of Kanichar Village, Iritty Taluk, Kannur District The project comes under Category B, Activity 1(a), (i) as per the Schedule of EIA Notification 2006 and as per O.M. No. L-11011/47/2011-IA.II (M) dated 18<sup>th</sup> May 2012 of Ministry of Environment and Forests. It is further categorized as Category B2 as per the O.M. No. J-13012/12/2013-IA-II (I) dtd. 24.12.2013 of Ministry of Environment and Forests, since the area of the project is below 25 hectares. As per gazette notification no SO 190(E)dtd 20/01/2016, Government of India and GO(Ms)no.05/2016/Envtd 04/04/2016,Govt:of Kerala, DEIAA and DEAC constituted for considering the applications for environmental clearance less than 5 hectares in individual cases and 25 hectares in cluster

The proposed project site falls within 11°50'50.41"N to 11°50'53.87"N 75°46'54.94"E to 75°46'59.15"EThe land area consists of 0.9898 hectares, which is private land.

The Secretary,  
Kanchi Panchayat,  
Iritty Taluk, Kannur District,  
Kerala.

Dt. 03/07/2017

Sub:- Environmental Clearance (E.C.) – Proposed Quarry Project at  
Survey No. 1561 , Kanichar Village, Kanichar Panchayat, Iritty  
Taluk, Kannur District, Kerala – Submission of the E.C. Order –  
Compliance to the condition of Environment Clearance – Reg.

Respected Sir,

1. This refers to the Environmental Clearance obtained to the proposed Quarry Project at Survey No. 1561 , Kanichar Village, Kanichar Panchayat, Iritty Taluk, Kannur District, Kerala vide Order No. 09/KNR/2017/DEIAA dt. 01/07/2017.
2. We hereby submit a self attested copy of the Environment Clearance Order No. 09/KNR/2017/DEIAA dt. 01/07/2017. This is in compliance to the condition of the E.C. Order.

Kindly acknowledge the receipt of the same.

Thanking you,

Yours respectfully,  
for Sri Lakshmi stone crusher,

  
C.G George,  
(Managing Partner)
