Compliance Status of the General Conditions for Mining Projects Laid down by the State Environment Impact Assessment Authority, Kerala vide their Environment Clearance No.81/2017 dated 05/01/2018.

SPECIFIC CONDITIONS

SI No	Condition	Status of Compliance
1	A Mines Manager shall be appointed to control, direct, manage and supervise Quarrying Operations as required under the Mines Act 1952.	A Permit manager is appointed to supervise Quarrying Operations.
2	Health and welfare measures for the persons employed shall be implemented.	Health and welfare measures for the employees is being implemented.
3	Controlled blasting should be practiced, and blasting should be done only during day time. The mitigating measures for control of ground vibrations to arrest the fly rocks and boulders should be implemented.	All precautionary measures are adopted while blasting operations are carried out. I. No secondary blasting like Pop Shooting or Plaster Shooting are undertaken for breaking down large boulders, to avoid Air Blast and Fly Rocks. Only rock breakers will be used for breaking down bigger boulders. II. Additional precaution of controlled blasting with sand bags and wire mesh/blasting pads are used so that there are no fly rocks from the blast
4	Plantation shall be done which includes a green belt of adequate width around the Mining Lease area excluding the rocky area, along roads, overburden dumps and non-mineralized area by planting suitable native species in consultation with the local DFO/ Agriculture Department.	A green belt of a width of 7.5 mts has been made along the periphery of the Lease area by planting local species saplings. Plantation at other places will be undertaken in a phased manner after starting Quarrying operations.
5.	The drains should be regularly desilted and maintained properly. Check dams and gully checks shall be constructed wherever required to arrest siltation. De siltation shall also be done every year before the onset of monsoon.	All civil structures made for arresting silt will be de silted before onset of Monsoon.
6	Fencing must be maintained properly all around the lease area.	The entire lease area is fenced and is well maintained.
7	The CSR should cover the felt needs of the locality with special emphasize for implementing ground water recharging techniques in and at the vicinity of the proposed site.	Rs 1.0 Lakh worth of CSR works is presently implemented. Balance works will be taken up in due course of time.
8	Appropriate sign boards should be displayed	Signboards have been displayed. (Photos are attached as Annexure 4)

9	The blasting time must be displayed and strictly adhered to.	Blasting time is displayed.
10	Dust suppression mechanism must be in place.	Water tankers with sprinklers are in use.
11	A separate small plot to be maintained in the premise to preserve rare and endemic species, if any, listed in the bio diversity assessment, etc.	No rare and endemic species is present in the lease area.
12	The PPV values must be less than 10 mm/sec.	PPV values will be kept below 10 mm/sec.
13	The green belt shall be provided along the periphery.	Green belt of 7.5 mts width has been provided along the periphery of the lease.
14	Where the height of the bench formed during earlier workings exceeds the maximum reach of the excavator engaged for work, such bench height shall be reduced from top to bottom.	Height of benches will be maintained as specified in the approved Mining Plan.
15	Loose or hanging rock or mineral boulder on the side wall shall be dressed down before engaging persons for work at the bottom of the bench.	Benches will be properly dressed by excavators or by manual means.
16	Permanent boundary pillars should be fixed by the proponent before commencing quarrying.	Permanent boundary pillars have been fixed. (photos are attached as Annexure 5)
17	No quarry blasting to be undertaken and sustained till warning time limit expires and/or when continuous 48 hours rainfall exceeds 8cms and blasting shall not be resumed until 24hours of rain free situation arises in the quarry locality based on the evaluation by the revenue officials.	Agreed
18	All waste dumps and top soil dumps shall be properly stabilized using coir mats or bio regeneration. Proper drainage system shall be provided so that water is properly diverted away from the dumps slopes with no disturbance to the stability of the slopes.	Coir mats shall be used to cover waste dumps. Proper drainage system shall be provided so as to avoid destabilizing of dumps.
19	All dump slopes shall be sufficiently stabilized by using appropriate species mix of grass, creepers, shrubs and trees. This shall be done in consultation with the Forest department and local research institutes and experts I stabilization of mine dumps.	All dump slopes will be stabilized as specified.
20	Garland drains of at least 2 mts width shall be provided all along 7.5 mts buffer zone to divert the water from entering the	Garland drains of 2 mt width shall be made in October 2018.

	Quarry slopes. These drains shall be cleaned every year before the monsoon season	
21	The water from the garland drainage shall be directed to the silt settling ponds. The clarified overflow from the silt settling ponds shall be directed to a Rain Water Harvesting (RWH) pond before releasing the clarified water to the natural water course.	Only clear natural water is let out into the natural water course.
22	A retaining wall of stone rubble with wire (2 mt) shall be constructed at the bottom of the slope of the Quarry lease to arrest any likely mesh of sufficient width and strength (not less than roll of boulders during heavy rainfall.	Will be constructed.

GENERAL CONDITIONS OF HEALTH

SI No.	Conditions	Status of compliance
1	First Aid kit provided in the work site. It shall be periodically maintained properly. Some labourers shall be trained on First Aid.	First Aid kits are provided in the work site and key personnel will be trained to render first aid in case of emergencies.
2	Wholesome drinking water should be provided.	Wholesome potable drinking water is provided
3	Premises should be maintained as wet to suppress the dust.	Dust will be suppressed at the source.
4	Sanitary type of latrines and urinals should be provided.	Latrines and urinals are provided.
5.	Resting place to be provided for workers	Resting place is provided to workers.
6	'No Smoking' board should be exhibited according to COTPA act.	'No Smoking' board is exhibited. (Copy is attached as Annexure 4)
7	Work should not be done in night.	Work is done only during day light.
8	Details of nearest hospital, shortest route to hospital and contact no. etc. should be available	Emergency contact numbers of Key persons, Hospitals, police station, etc. is prominently displayed. (photo of the board is attached as Annexure 4)
9	Approach roads should be maintained properly	Approach roads are well maintained.

GENERAL CONDITIONS

SI	Condition	Compliance Status
No		
1	Rainwater harvesting facility should be	Not Applicable.
	installed as per prevailing provisions of	No permanent structures constructed within
	KMBR/KPBR, unless otherwise specified.	Mining Lease.
2	Environment Monitoring Cell as agreed	Environmental Monitoring Cell has been formed
	under the affidavit filed by the proponent	and is headed by Mr. C.G. George
	should be formed and made functional.	
3.	Suitable avenue trees should be planted	Local species saplings procured from Forest

	1 01 01 01 01	
	along either side of the tarred road and	department and planted before onset of
	open parking areas, if any, including	monsoons.
	approach roads and internal roads.	
4	Maximum Possible Solar Energy	Mine operates only during daylight hence there is
	generation and utilization shall be	no need for any additional lighting.
	ensured as an essential part of the	
	Project.	
5	Sprinklers shall be installed and used in	Water tankers with sprinklers are in use.
	the Project Site to contain dust emissions.	
6	Eco-restoration, including the Mine	Agreed
	Closure Plan shall be done at the own cost	
	of the Project Proponent.	
7	At least 10 per cent of total excavated Pit	Agreed
	area should be retained as water storage	-
	area and the remaining area should be	
	reclaimed with stacked dumping and	
	overburden and planted with indigenous	
	plant species that are eco-friendly, if no	
	other specific condition on reclamation of	
	the Pit is stipulated in the EC.	
8	Corporate Social Responsibility (CSR)	We have implemented CSR of Rs 1.0 Lakh. The
	agreed upon by the Proponent should be	balance agreed commitments and will be
	implemented.	undertaken shortly.
	The Lease area will be fenced off with	Lease area is fenced off.
	barbed wires to a minimum height of 4 ft	Sign boards have been erected at prominent
	around, before starting of Mining. All the	places. (Photos are attached as Annexure 5)
	boundary indicators (boards, stores,	. ,
9	markings, etc.) shall be protected at all	
	times and shall be conspicuous.	
10	Warning alarms indicating the time of	Necessary precautions while blasting is taken.
	Blasting (to be done at specific timings)	
	has to be arranged as per stipulations of	
	the Explosives department.	
11	Control measures on noise and vibrations	Noise and vibrations are kept within KSPCB
	prescribed by KSPCB should be	prescribed norms.
	implemented	I. Use of sharp drilling, delivery of
	•	compressed air at optimal pressure.
		II. Proper maintenance of compressor,
		drilling machine, jackhammers and tipper
		trucks.
		III. Regular monitoring of noise levels are
		being done within the core zone and the
		buffer zone of the mining lease area.
12	Quarrying activities should be limited to	Quarrying activities limited to daytime.
	daytime as per KSPCB guidelines/specific	The second secon
	conditions.	
13	Blasting should be done in a controlled	Blasting is done in a controlled manner and is
1.0	manner as specified by the regulations of	done technically as prescribed by the mining
	the Explosives department or any other	statutes.
	·	Only a small diameter drill holes of 33/48mm
	agency.	diameter with 25mm cartridges slurry/ emulsion
<u> </u>		diameter with 25mm tarthuges sturry/ emulsion

		explosive are used for blasting, no large diameter holes are proposed for blasting. With optimum blast design, effective blasting techniques with delay detonators and low charges per delay, carte has been taken to limit the blast vibrations and the PPV value below 10mm per second.
14	A licensed person should supervise/control the Blasting Operations	Blasting supervision and control is done by a Mining Official having DGMS Certificate.
15	Access road to the quarry shall be tarred to contain dust emissions that may arise during transportation of materials.	Access road to the Quarry is tarred.
16	Overburden materials should be managed within the site and used for reclamation of Mine Pit as per Mine closure Plan/specific conditions	Overburden material is used for road making and as a filler along the Green Belt for plantation purpose.
17	Height of Benches should not exceed 5 M and width should not be less than 5 M, if there is no mention in the Mining Plan/specific conditions	Agreed
18	Mats to reduce fly rock blast to a maximum of 10 PPV should be provided	Controlled blasting technique is adopted. PPV is kept to a minimum. Delay detonators are used.
19	Maximum depth of Mining from general ground level at site shall not exceed 10 m	Agreed
20	No Mining operations should be carried out at places having a slope greater than 45°	Agreed
21	Acoustic enclosures should have been provided to reduce sound amplifications in addition to the provisions of green belt and hollow bricks envelop for crushers so that the noise level is kept within prescribed standards given by CPCB/KSPCB.	Crusher unit is not installed within Mining Lease.
22	The workers on the site should be provided with the required protective equipment such as ear muffs helmet, etc.	Requisite Personal Protective equipments (PPE's) is provided as required to all employees.
23	Garland drains with clarifiers to be provided in the lower slopes around the core area to channelize storm water.	Garland drains are constructed
24	The transportation of minerals should be done in covered trucks to contain dust emissions.	All trucks transporting material are covered by firmly tied tarpaulin
25	The proponent should plant trees at least 5 times the loss that has been occurred while clearing the land for the project.	140 nos. local species saplings have been procured from the Forest dept, Kannur
26	Disposal of spent oil from diesel engines should be as specified under relevant Rules/Regulations.	Spent oil is reused as a lubricant for drilling.
27	Explosives should be stored in magazines in isolated place specified and approved by the Explosive Department.	Explosives is stored in a Licensed Explosives Magazine, which is approved by PESO. (Copy of the Explosive license is attached as Annexure 1)

28	A minimum buffer distance of 100 M from the boundary of the quarry to the nearest dwelling unit or other structures, not being any facility for mining shall be provided. 100 M buffer distance should be	No dwellings are situated within 100 M from the boundary of the quarry. Mining area is not located near any forest areas.
	maintained from forest boundaries	, , , , , , , , , , , , , , , , , , , ,
30	Consent from Kerala State Pollution Control Board under Water and Air Act(s) should be obtained before initiating mining activity.	Consent from KSPCB under Air and Water Act(s) is obtained. (copy of the consent is attached as Annexure 2)
31	All other statutory clearances should be obtained, as applicable, by project proponents from the respective competitive authorities including that for blasting and storage of explosives.	All statutory clearances obtained. The DGMS permission is under process.
32	In the case of any change(s) in the scope of the Project, extent, quantity, process of mining technology involved or in any way affecting the environment parameters/impacts as assessed, based on which only the EC is issued, the project would require a fresh appraisal by this Authority, for which the proponent shall apply and get the approval of this Authority.	In case any change is required, a fresh appraisal will be submitted for obtaining Approval from the Authority.
33	The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the Environmental Clearance under provisions of the Environment (Protection) Act,1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.	Agreed.

34	The stipulations by the Statutory Authorities under different Acts and Notifications should be complied with including the provisions of the Water (Prevention and control of Pollution) Act,1974, the Air (Prevention and control of Pollution) Act1981, the Environment (Protection) Act,1986, the Public Liability (Insurance) Act,1991 and EIA Notification,2006	Agreed
35	The project proponent should advertise in at least 2 newspapers widely circulated in the region, one of which(both the advertisement and the newspaper) shall be in the vernacular	Advertisements informing EC accordance to the Project is done in 2 nos newspapers. (photos of the newspaper advertisement is attached as Annexure 3)

	language informing that the Project has been accorded Environment Clearance and the copies of the Clearance letters are available with the State Environment Impact Assessment Authority (SEIAA) office and may also be seen on the website of the Authority at www.seiaakerala.org . The advertisement should be made within 10 days from the date of receipt of the clearance letter and a copy of the same signed in all the pages should be forwarded to the Office of this Authority as confirmation	
.36	A copy of the clearance letter shall be sent by the proponent to the concerned Gram Panchayat/District Panchayat/Municipality/Corporation/Urban local Body and also to the Local NGO, if any from whom suggestions/representations, if any were received while processing the proposal. The Environmental Clearance shall also be put on the website of the company by the proponent.	A copy of the Clearance is submitted to the Pattiam Grama Panchayat on.
37	The proponent shall submit half yearly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the respective Regional office of the MOEF, Govt. of India and also to the State Environment Impact Assessment Authority (SEIAA) office	Half yearly reports will be submitted as stipulated.
38	The details of Environment Clearance should be prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times Roman font of size not less than 40. Sign board with extent of Lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public	Details of Environmental Clearances are prominently displayed at the entrance to the Mine. (photo of the sign board is Attached as Annexure 4)
39	The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.	Provided
40	No change in mining technology and scope of working should be made without prior approval of the SEIAA. No further expansion or modifications in the mine shall be carried out	Prior approval from the SEIAA will be sought in case of change of mining technology.

	water sprinkling shall be carried out in critical areas prone to air pollution and having high levels of PM10 and PM2.5 such as haul road, loading and unloading points and transfer points-it shall be ensured that the Ambient Air Quality parameters conform to the norms	roads with water tankers.
	areas prone to air pollution and having high levels of PM10 and PM2.5 such as haul road,	roads with water tankers.
	areas prone to air pollution and having high	roads with water tankers.
		roads with water tankers.
	water sprinkling shall be carried out in critical	roads with water tankers.
	Encouve saleguara measures sacir as regular	
45	Effective safeguard measures such as regular	Regular water sprinkling is done on haul
	particularly after monsoons and maintained properly	
	The drains shall be regularly de silted	
	mine area, roads, green belt development, etc.	
	collected should be utilized for watering the	
	the river and other water bodies. The water so	
	off of water and flow of sediments directly into	
	working, mineral and OB dumps to prevent run	the mining lease.
	size shall be constructed around the mine	Catch drains are made along the periphery of
44	Catch drains and siltation ponds of appropriate	
	sustaining	
	continue until the vegetation becomes self-	
	dump. The entire excavated area should	
	shall be undertaken for stabilization of the	
	run off. In critical areas, use of geo-textiles	
	native species to prevent erosion and surface	
	should be scientifically vegetated with suitable	
	shall be maintained to 45°. The OB dumps	
	the width 20 m and overall slope of the dumps	
	height of the dumps shall not exceed 8 m and	
+3	at earmarked dump site(s) only. The maximum	
43	during the mining operations shall be stacked	aiong the Green/Salety zone.
	plantation. The Over burden (OB) generated	OB generated is used for plantation purposes along the Green/Safety zone.
	shall be used for land reclamation and	·
	The top soil, if any, shall be temporarily be stored at earmarked site(s) only for the topsoil	Available top soil will be used at the Green belt for plantation.
	fugitive emissions.	Available top soil will be used at the Crass
	unloading points & transfer point to reduce	
	should be increased at places loading and	Annexure 6)
	Pollution Control Board. Water sprinkling	monitoring reports have been attached as
	amended from time to time by the Central	all places appropriately. (photos and

	Bangalore shall monitor compliance of the	officer(s) from the Regional Office during
	stipulated conditions. The Project authorities	his/their visit. All available data will be
	should extend full cooperation to the Officer(s) if the Regional Office by furnishing the	provided.
	requisite data/information/monitoring reports.	
51	Any appeal against the Environment Clearance	Agreed
J1	shall lie with the National Green Tribunal, if	Agreed
	preferred, within a period of 30 days as	
	prescribed under Section 16 of the National	
	Green Tribunal Act, 2010	
52	Concealing the factual data or submission of	Factual and true data will be submitted.
	false/fabricated data and failure to comply	
	with any of the conditions mentioned above	
	may result in withdrawal of this clearance and	
	attract action under provisions of the	
	Environment (Protection) Act, 1986.	
53	The SEIAA may revoke or suspend the order for	Agreed
	non-implementation of any of the specific or	
	this implementation of any of the above	
	conditions is not satisfactory. The SEIAA	
	reserves the right to alter/modify the above	
	conditions or stipulate any further condition in	
	the interest of the environment protection	
54	The above conditions shall prevail not	Agreed
	withstanding anything to the contrary,	
	inconsistent or simplified, contained in any	
	other permit, license on consent given by any	
	other authority for the same project.	Agrood
55	The order is valid for a period of 5 years of the	Agreed
	expiry date of Mine lease period issued by the	
EG	Government of Kerala, whichever is earlier	Agrood
56	The Environment Clearance will be subject to	Agreed

	the final order of the courts in any pending litigation related to the land or the project, in any court of law.	
57	The Mining operations shall be restricted to above ground water table and it should not intersect ground water table.	Mining operations will be restricted to above ground water table and due care will be taken so as not to intersect ground water.
58	All vehicles used for transportation and within the mines shall have 'PUC' certificate from authorized pollution checking center. Washing of all vehicles shall be inside the Lease area	Will ensure that all transportation vehicles have PUC issued by an authorized Pollution checking center.
59	Project proponent should obtain necessary prior permission of the competent authorities for drawl of necessary quantity of surface and ground water for the project.	Agreed.
60	Regular monitoring of flow rates and water quality upstream and downstream of the springs and perennial nallahs flowing in and around the mine lease area shall be carried out and reported in the six-monthly reports	No perennial nallah flows through the lease or exist around the Mine Lease.
61	Occupational health surveillance program of the workers should be undertaken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.	Occupational health surveillance will be undertaken

Subject:

Possession for Use of of Explosives from magazine situated at Survey No(s).:88/1, Kolavallur, Thalassery Tk., Dist. KANNUR, Kerala - Licence No.: E/SC/KL/22/746(E32353) granted in Form LE-3 of Explosives Rules, 2008 - Amendment of Quantity of Explosives/Monthly Purchase Limit.

Sir(s),

Please refer to your letter No. nil dated 11/12/2014 on the subject cited above.

The Licence No.: E/SC/KL/22/746(E32353) is forwarded herewith duly amended in respect of followings;
THIS IS FOR ADDITIONAL QUARRY AT SY.No.73/81/1-2, PATITAM VILLAGE, THALASSERY TALUK, KANNUR. VALID PERMISSIONS, AS APPLICABLE, FROM THE STATE GOVERNMENT AGENCIES SHALL BE IN POSSESSION..

The licence capacity at any one time shall not exceed the kinds and quantities mentioned below;

No	Explosive(s)	Class	Div	Sub Div	Capacity	Unit
	Nitrate Mixture	2	0	0	150	Kg.
1		6	1	0	2000	Mtrs
2	Safety Fuse	6	3	0	2500	Nos.
3	Electric Detonators	6	3	0	5000	Nos.
4	Ordinary Detonator	0	3	· ·		

Quantity of explosives to be purchased in a calendar month[applicable for licence under article 3(b) and (c)]: 20 times as above.

This Licence shall remain valid till 31st day of March 2019.

An amount of Rs. 2640/- balance is in your credit, which may be utilized for future transaction by quoting this reference.

For further renewal of licence, please follow the procedure under Rule 112 of Explosives Rules, 2008. Receipt of this letter may please be acknowledged.

Enclosures:

Yours faithfully.
